

SIP TRUNKS

YOUR GLOBAL COMMUNICATIONS SOLUTIONS

IT'S YOUR CALL.

Choose the service that minimizes complexity, maximizes security and never compromises on quality

Cloud communications are transforming your marketplace, opening the door wide to a new era of flexibility and collaboration. As you explore your businesses' expanding options for network simplification and cost savings, two key factors to consider in a provider are security and reliability.

NuWave is proud to be recognized among an elite handful of partners certified by Microsoft to provide your business with the strongest commercial encryption protocols, TLS/SRTP. Combine the security of TLS/SRTP (which exceed regulatory requirements for HIPAA, PCI, SOX, and other government compliances) with NuWave's geo-redundant, carrier-grade network and realize the positive business outcomes of these advanced solutions.

Value Driven

Realize recurring monthly cost savings vs. TDM fixed monthly OpEx costs. Get started quickly with same-day provisioning.

RELIABILITY FOCUSED

Carrier-grade geo-redundant network with continual technological advancements for improving reliability, redundancy, and quality.

SECURITY STRONG

Utilizing the strongest security protocols like TLS/SRTP, and/or VPN for HIPAA, PCI, SOX, and other government compliances.
